DRIVING YOUR PASSION

INTEGRITY. REPUTATION. COMMITMENT.
At American Coach®, these are more than just words. They’re the principles upon which we build every motorcoach, every day.

We believe that every luxury motorcoach owner deserves an extraordinary journey. This is why the American Coach story begins long before you step inside or get behind the wheel. It begins with innovative engineering, cutting-edge construction techniques and a meticulous attention to detail. But a beautiful, distinctive design is only the beginning. Through our expert service team and dedicated nationwide dealer network, we’ve earned an unsurpassed level of customer loyalty.

We’re with you at every turn, every time, year after year. Your dreams are limitless, and so is our commitment to every American Coach owner. We’re more than a luxury motorcoach manufacturer. We’re a partner in the pursuit of your passion.

## IMPORTANT — PLEASE READ:

Product information, photography and illustrations included in this publication were as accurate as possible at the time of printing. For further product information and changes, please visit our website at www.AmericanCoach.com or contact your local American Coach dealer. Prices, materials, design and specifications are subject to change without notice. All weights, fuel, liquid capacities and dimensions are approximate. American Coach has designed its recreational vehicles to provide a variety of uses for its customers. Each vehicle features optimal seating, sleeping, storage and fluid capacities. The user is responsible for selecting the proper combination of loads (i.e., occupants, equipment, fluids, cargo, etc.) to ensure that the vehicle’s capacities are not exceeded.

1. GVWR (Gross Vehicle Weight Rating) is the maximum permissible weight of this fully loaded motor home. The GVWR is equal to or greater than the sum of the (UVW) unloaded vehicle weight plus the (OCCC) occupant cargo-carrying capacity.

2. GAWR (Gross Axle Weight Rating) is the maximum permissible loaded weight a specific axle is designed to carry.

3. GCWR (Gross Combined Weight Rating) is the value specified by the motor home manufacturer as the maximum allowable loaded weight of this motor home with its towed vehicle. Towing and braking capacities may be different. Refer to American Coach and chassis manufacturer’s manuals for complete information.

4. Length measured from front bumper to rear bumper (excludes accessories).

5. Excludes safety equipment and awnings.

6. Motor homes feature a body width over 96” which will restrict your access to certain roads. Before purchasing, you should research any state and/or province road laws which may affect your usage.

N/A = Not Applicable

† The chassis manufacturer recommends the installation of a supplemental brake control system to activate the brakes on the vehicle or trailer you are towing. Hitch receiver ratings expressed are maximum for the hitch receiver installed and may require the purchase of additional equipment that is dependent on the weight of the towed load. Consult with hitch receiver manufacturer for further information.

†† The Minimum Towable Load of this vehicle is the available weight capacity, up to GCWR, when the coach is fully loaded to maximum GVWR. However, if the coach is loaded to something less than maximum GVWR, that extra available weight capacity can be added to your Towable Load. For example, if your coach is loaded to 1,000 lbs less than maximum GVWR, your Towable Load increases accordingly. Do not exceed the hitch rating weight, GVWR or GCWR.

* UVW and OCCC are found on the label containing the federal certification tag in each RV.

** All 2016 American Coach motor homes include a 1-year American Coach Premier Roadside Assistance membership. For complete info, see your American Coach dealer.
